Programação
Bootcamp BairesDev - Machine
Learning Training
Bootcamp meutudo - Mobile
Developer

# Henrique Gabriel

Full-Stack Developer | JavaScript, Typescript, React, Node.js, SQL &
APIs REST
Campinas e Região

## Resumo

Solid Full-Stack Developer focused on the JavaScript/TypeScript
ecosystem with expertise in building scalable, end-to-end solutions.
I specialize in the challenge of transforming complex ideas into
efficient, high-impact web products.

My Solution is Architecture-Driven: I ensure quality through rigorous
Automated Testing (TDD/Jest) and application of Clean Architecture
patterns (e.g., using NestJS for robust backends). Proven
experience covers the full cycle: designing RESTful/GraphQL APIs
with Node.js/Express, advanced database modeling (PostgreSQL,
MongoDB, Prisma), and implementing Agile Methodologies
(SCRUM/Kanban).

The Result is Deliverability: Strong advocate for DevOps practices—
proficient in Docker, Git, CI/CD—which ensures speed and stability.
My versatility across stacks (Java, Ruby on Rails) is an asset, but my
core focus remains delivering performant, maintainable code within
the JS ecosystem.

***

Key Skills and Technologies

Languages: JavaScript, TypeScript, SQL, Python, Ruby, Java

Frontend: React.js, HTML5, CSS3

Backend & Frameworks: Node.js, Express.js, Ruby on Rails, NestJS

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma, Knex

APIs: RESTful, GraphQL

Methodologies: TDD, Clean Architecture, SCRUM, Kanban

DevOps & Cloud: AWS, Docker, CI/CD, Git, Nix

Testing: Automated Testing (Unit, Integration), Jest, RSpec

---

## Experiência

DesenvolvendoMe
Desenvolvedor
julho de 2024 - outubro de 2025 (1 ano 4 meses)

Full-Stack Development (End-to-End): Delivered end-to-end Full-Stack solutions using a modern technology stack. Leveraged TypeScript to ensure code quality and safety, Node.js for robust backend logic, and React/React Native for building responsive web and mobile interfaces.

Database & Performance Optimization: Designed and optimized PostgreSQL database models, focusing on query performance and data architecture to ensure High Availability (HA).

API Design & Scalability: Created and maintained robust RESTful APIs, implementing best practices for design, security, and scalability to handle high-volume traffic.

Agile & Continuous Delivery: Actively collaborated in development cycles using Agile methodologies (SCRUM/Kanban), contributing to workflow optimization and facilitating continuous delivery.

Code Quality & Version Control: Ensured software quality through Test-Driven Development (TDD) practices, rigorous code analysis, and strict version control using Git/Gitflow within the GitHub environment.

Infrastructure & Deployment: Continuously improved essential Hard Skills, including utilizing AWS for deployment and infrastructure management, and maintaining a robust development environment (Linux, Terminal, VS Code, Heroku/AWS) to ensure deployment consistency.

Stack Versatility: Broadened technical capabilities by diversifying the stack with exposure to Ruby on Rails and advanced JavaScript techniques.

Soft Skills & Impact: Demonstrated strong Self-Management, complex Problem-Solving skills, and attention to detail, proving essential in overcoming technical challenges. Cultivated crucial Soft Skills like Effective Communication, Collaboration, and Empathy within a dynamic, results-driven team setting.

## Formação acadêmica

E. E. Dr Joaquim Silvado
High School Graduate · (fevereiro de 2006 - novembro de 2012)
